Introduction

VacTrack is an initiative to ease out parenting by helping with keeping track of vaccination schedules, reports at one place. It provides a platform where parents can have access to vaccination reports of their children and upcoming vaccination schedules at one place.

Features

The user once hits the application in the browser. He'll have the following options.

1. Home
2. About Us
3. Help
4. Sign Up
5. Sign in

Once a user signs in. there will be different options available for an authenticated user.

1. Add dependents
2. View dependents
3. Schedule any vaccination for a user.
4. Update vaccination schedule.
5. Update self profile or dependents profile.

Home

Home is the first page that gets displayed when a user opens the application in the browser. It shows the motive of the application. There's a read more button which will open a new page with detailed motive of the application.

Let's Track Vaccination

With the exception of clean, safe drinking water, no human endeavor rivals immunization in combating infectious diseases and reducing mortality rates. Today, vaccination can prevent several infectious diseases, and there are new vaccines on the horizon with the potential to prevent even more.
